

ELIASON LAUNCHES NEW GATE POST SYSTEM

10/5/09 - Eliason Corporation, a leading manufacturer of double action traffic doors and energy saving products has released its new Gate and Post System. The Eliason Gate® and Post System is an attractive, sturdy, free-standing mounting system that simplifies the installation of gate doors in restaurants, supermarkets and other retail applications and eliminates the need to attach mounting hardware to expensive counters, cabinets, or walls. Gate doors are typically used to create separation between the customer and employee areas without impeding passage.

The all new Eliason Gate® and Post System is the latest innovative solution from Eliason and delivers superior performance, efficiency and value. This system is the industry's premier gate solution for pharmacies, photo departments, department stores, restaurants, and convenience stores of all types and sizes.

The Eliason Gate and Post System reflects a long legacy of Eliason quality. It is built to last and reduces installation and maintenance costs. The Gate Door features two unique finish options: textured, scratch resistant polymer available in a variety of colors; or a high-pressure laminate finish with an unlimited selection of décor options. The Post is constructed of structural steel tubing and features a black, powder-coated scratch-resistant finish. The Post is adjustable in height up to 42". The Gate and Post features Eliason's unique double-action Easy Swing® hardware and is available in singles or pairs, guaranteed to fit any opening width.

Eliason's unmatched custom manufacturing capabilities enables us to produce gates to meet each customer's unique specifications and décor requirements. The system is strong, easy to install, and will work in any gate opening.

Eliason, founded in 1952, manufactures custom traffic doors and energy saving products in our 110,000 sq. ft. facility in Kalamazoo, Michigan. With a lead time of two weeks on our custom door products, we are able to quickly serve our valued customers. Eliason Easy Swing® double action traffic doors and Energy Saving Econo Covers and Strips are widely regarded as "best in class" products, with world-wide distribution. Visit us at eliasoncorp.com.
